A step ahead. Since 1897.

KAINDL laminate flooring from Austria, Europe. 100 years of tradition, 100 years of innovation: what began as a small sawmill in 1897 has meanwhile grown into a global player in the field of flooring & interior design. With plants and high-tech installations that set new standards in the wood-processing industry. For EURO it's a gratification to Be a part of KAINDL to market & sell their products in INDIA exclusively.

- * Kaindl is the biggest producer of Laminate Flooring in the world.
- * Kaindl is the 1 Company to come out with Digital Printing Technology.
- * Due to Digital printing technology Kaindl has unique designs, which can be customised.
- * Digital Printing technology helps customers to get 100% same floor as desire in both laminate & engineered.
- * Specially designed patterned kaindl lock for easy installation.
- * Good ratio between price, quality and market possibilities.
- * Various decors to choose from.
- * Easy to clean and maintain.

Environmental protection meets quality of life. The carrier bases for our floors are made exclusively of wood from PEFC-certified forests. And the "GREENGUARD" label guarantees the high quality of the air in your rooms.

PEFC : Programme for the Endorsement of Forest Certification the world's largest forest certification system.

Easy to Lay - Without Glue

EURO FLOORS...

Complete Wooden Flooring Solutions...

Euro Flooring Pvt. Ltd. is one of the largest importers of wooden flooring products in India. Based out of Bangalore, having Pan India presence with offices in every Metro city and retailers across the country. Our product range includes Laminated, Solid wood, Bamboo, Engineered Hardwood, Exterior deck, and Sports Wood flooring. All our products are manufactured in line according to European norms with highest technical specifications and are finest quality, customised to match Indian micro-climatic conditions.

With the single minded motto of providing best in class products with customer satisfaction as our top most priority – we are expanding our footprints in the country and continuously adding new products to our portfolio.

Care & Maintenance

Advanced technology and innovative finishing makes your EURO floor easy to clean maintain, adding years to your floor. Here are few mandatory instructions that will allow your EURO floor to preserve its wonderful qualities for many years.

1. Use quality dirt-trapping doormats outside each entrance of your wooden flooring area to prevent dirt, sand, grit and other substances.
2. Certain types of casters on furniture may damage your EURO floor. Use protective pads under all furniture legs in order to erase their movements and prevent scratches and dents.
3. Never allow any liquid to remain on your EURO floor. Stains should be removed immediately while they are still wet. Regularly sweep or vacuum the floor to prevent grit or abrasive dust from accumulating and scratching the surface.
4. Wipe up any spills immediately with a clean dry cloth or paper towel. A moist cloth may be used to wipe up food spills or mud. Never use wax, oil-based detergent or any household cleaner. These may dull or damage the finish, leaving a greasy film.
5. Keep 'spike heels' shoes in good condition. Spike heels in disrepair may expose a metal tip that is harmful to your EURO Floor.
6. Close your curtains or blinds where extreme sunlight hits the floor. A combination of heat and sunlight may cause the flooring to fade or discolour.

FOR	USE
Rubber marks, scrapes or scuffs from shoe heels, dirt from the street, pencil or crayon marks.	A dust cloth.
Fruit, berries, milk, beer, wine, tea and soft drink spills.	An absorbent cloth or a damp cloth If it has already dried in.
Blood and urine stains.	A damp cloth.
Nail polish, shoe polish, varnish, ink, make up and pen stains.	A drop of acetone on a clean cloth.

Matching Profiles

Skirting: Used to covers the expansion gap between floor & wall.

Beading: Used to cover the expansion gap between furniture & Flooring. It is also used to cover the gap between wooden partication & the floors.

T Profile: Used as a threshold in doorways or as a transition strip where your wood floors meets floor or any other surface (i.e., carpet, tiles etc.) of similar height. T Profile can also be used to change the direction in which the floor is layed & to cover the expansion gap.

Stair Nose Profile: Used to cover the front edge of a stair tread or step. It also covers the expansion gap.

End Profile: Used to finish the floor at vertical surface such as exterior door thresholds, sliding glass doors, raised hearths, marble sills. It also covers the expansion gap.

Reducer Profile: Used as a transition from the height of the sub-floor to the height of your wood floor. It also covers the expansion gap.
